Benuu LLC | Veteran-owned small business

Capability Statement

info@benuusolutions.com
benuusolutions.com

Benuu LLC is a veteran-owned small business that delivers managed security operations, endpoint management, NIST SP 800-171 / CMMC readiness and practical AI solutions and training for federal agencies, defense suppliers and manufacturers. Our tenant-isolated platform brings detection, patching and compliance evidence into one view, so security teams, leadership and assessors work from the same record.

Core competencies

- **Managed SOC:** Wazuh-based detection with MITRE ATT&CK-mapped rules, triage and case management.
- **Endpoint & RMM:** patch management, software inventory and remote remediation.
- **NIST SP 800-171 / CMMC readiness:** control mapping, evidence collection, SSP and POA&M support.
- **IT systems design & modernization:** systems integration, security architecture and infrastructure.
- **AI solutions:** custom AI assistants and agents, prompt engineering, ERP integrations and AI governance for business and government.
- **AI & security training:** AI adoption, prompt-writing and security awareness training for staff and leadership, plus curriculum design.

Differentiators

- **Founder-delivered:** the person who scopes a requirement is the person who performs it.
- **Compliance built into operations:** every control point we monitor maps to a NIST SP 800-171 requirement and is kept as evidence.
- **Manufacturing and defense supply-chain focus:** built around shop-floor systems, ERP and DFARS reporting.
- **Disciplined data handling:** tenant-isolated, audit-logged platform; work involving CUI is scoped to a compliant environment before we bid.

Founder

- **Robert L. Bingham, Managing Member:** U.S. Army veteran (cyber and electronic operations).
- IT leadership in manufacturing: infrastructure, help desk operations, internal software and security compliance programs.
- Security consulting and NIST SP 800-171 / CMMC program experience.
